NOUSHAD KABEER

Lead AI Solutions Architect | Enterprise Multi-Agent Systems & Intelligent Content

Charlotte, NC | (603) 531-7071 | noushad.kabeer@yahoo.com | linkedin.com/in/noushad-kabeer | github.com/noushadkabeer

experience

2023 - Present

LINCOLN FINANCIAL GROUP — **CHARLOTTE, NC**

Sr Analyst / Lead Architect – GenAI & Intelligent Content Platforms

- ***Multi-Agent Architecture:*** Spearheaded the architecture and delivery of a production-grade multi-agent platform using LangGraph, LangChain, and frontier APIs (Anthropic Claude, OpenAI GPT-4o), reducing complex multi-step document processing times by 65%.
- ***Hybrid RAG Pipelines:*** Architected enterprise-grade Hybrid RAG pipelines combining pgvector dense semantic retrieval with BM25 sparse lexical search and semantic reranking, achieving 94.8% cross-page accuracy and reducing citation hallucinations to <1.2%.
- ***AI Governance & FinOps:*** Designed and enforced an enterprise AI FinOps framework, reducing monthly token spend by 42% through prompt caching, dynamic context pruning, and routing high-frequency classification tasks to lightweight SLMs.
- ***CI/CD Evals & Benchmarks:*** Built and operationalized automated CI/CD evaluation test suites in Python, benchmarking precision, recall, and hallucination guardrails across 200+ edge-case audit scenarios prior to production model promotion.
- ***Human-in-the-Loop (HITL):*** Instituted state-machine checkpointing in LangGraph, enabling compliance officers and underwriters to inspect intermediate reasoning graphs and approve automated drafts for high-risk regulatory filings.
- ***Team Leadership:*** Mentored and led an agile engineering pod of 8+ engineers and data practitioners, establishing team-wide architectural blueprints, Pydantic schema validation standards, and reusable tool libraries.

2019 - 2023

JOHN WILEY & SONS — **HOBOKEN, NJ / REMOTE**

Technical Lead – AI & Cloud Content Platforms

- ***AI-Assisted Workflows & NLP:*** Architected and delivered enterprise AI-assisted content workflows and NLP pipelines; automated entity extraction (NER), semantic topic modeling, and document classification across unstructured publications, improving discovery by 48% and reducing manual cataloging labor by $350K+ annually.
- ***Vector Search & Embeddings:*** Designed and deployed semantic search engines combining dense vector embeddings and FAISS similarity indexers with Elasticsearch on AWS and Azure, transitioning legacy keyword search to intent-aware contextual retrieval across millions of digital assets.
- ***High-Throughput ML Ingestion:*** Engineered distributed event-driven microservices in Python and Java (Spring Boot) on AWS (ECS, Lambda, S3), scaling system capacity to process 500,000+ daily document events and automated NLP inference tasks at sub-second latency.
- ***ML DevSecOps & CI/CD:*** Established automated Jenkins CI/CD delivery pipelines, containerizing NLP microservices and search APIs with Docker and Kubernetes, reducing deployment cycles from bi-weekly maintenance windows to zero-downtime daily builds.

2017 - 2019

LIBERTY MUTUAL — **DOVER, NH / REMOTE**

Technical Consultant – Enterprise Content & Cloud Platforms

- ***Cloud Architecture:*** Engineered multi-region Alfresco Enterprise Content Management (ECM) architecture on AWS Cloud, managing petabyte-scale policyholder records across distributed server clusters with 99.99% data durability.
- ***Content Migration:*** Designed and executed content replication and data migration pipelines using Simflofy and RESTful APIs, successfully transitioning 8M+ legacy insurance claims documents without downtime.
- ***Workflow Automation:*** Streamlined underwriting document review cycles by 40% by designing automated business process workflows integrated directly with the Activiti BPM Workflow Engine.

2016 - 2017

DUPONT — **BUDAPEST, HUNGARY**

Technical Consultant – Enterprise ECM Integrations

- ***ERP Integration:*** Architected custom enterprise extensions connecting Alfresco ECM with SAP ERP across 12 international manufacturing units; developed secure RESTful services with 92% unit/integration test coverage.

2015 - 2016

GENERAL ELECTRIC (GE) — **BANGALORE, INDIA**

Alfresco Solutions Architect

- ***Platform Upgrade:*** Led end-to-end upgrade of GE's enterprise content platform to Alfresco 5.1 on AWS Cloud with CloudFormation for 25,000+ concurrent enterprise users.

2008 - 2015

PwC, DBS BANK & SONY PLAYSTATION — **SINGAPORE / GLOBAL**

Senior Solutions Consultant – ECM & Distributed Systems

- ***Records & DAM:*** Engineered Documentum and Alfresco records management systems for PwC and Development Bank of Singapore; customized digital asset management (DAM) infrastructure on Amazon EC2 for Sony PlayStation.

education

2003 - 2006

BHARATHIAR UNIVERSITY — TAMIL NADU, INDIA

Master of Computer Applications (MCA)

- ***Academic Standing:*** Graduated First Class with Distinction. Specialized in Distributed Software Systems, Relational & Object Databases, and Systems Architecture.

skills

CORE ARCHITECTURAL COMPETENCIES — TECHNICAL & DOMAIN STACK

Frontier AI, Cloud Infrastructure & Enterprise Modernization

- ***Frontier AI & Agents:*** LangGraph, Model Context Protocol (MCP), LangChain, CrewAI, LlamaIndex, Anthropic Claude, OpenAI GPT-4o, Prompt Caching, Function Calling & Tool Use.
- ***Hybrid Search & RAG:*** Hybrid Retrieval (Dense + Sparse), pgvector, Qdrant, BM25, Reciprocal Rank Fusion (RRF), Semantic Reranking, Hierarchical Table Extraction.
- ***Governance & FinOps:*** Automated CI/CD Evals, Hallucination Guardrails, Human-in-the-Loop (HITL), Token Cost Optimization (-42%), Latency Profiling, SLM Routing.
- ***Enterprise Content (ECM):*** Alfresco (Subject Matter Expert), Documentum, Activiti BPM, Simflofy, Oracle Stellent, Content Migrations, Unstructured Data Silos.
- ***Cloud & Distributed Systems:*** AWS (Lambda, ECS, S3, RDS, CloudFormation), Docker, Spring Boot, J2EE, Microservices, Python, SQL, RESTful APIs, Git, Jenkins, Bamboo.
